

## Read & Write Extension

1. Go to the Chrome Web Store and search for “Read and Write.” Add the extension.
2. Go to any webpage. The Read & Write extension icon will appear in the address bar of any webpages where it can be used, such as Blendspace:

Click icon to launch the Read and Write toolbar

3. Click the Read & Write icon to launch it.

4. To have text read aloud, use your mouse to highlight what you want read, and then click the play button. *Note: after you highlight the text, the highlight may go away, but Read & Write will still read what you had highlighted.*
5. Only the darkened tools (above) are included in the free version:
  - a. Hover speech (mouse-over text and it will read it)
  - b. Play (reads page or what was selected with the mouse)
  - c. Pause (pauses reading; can play to continue)
  - d. Stop (stops reading)
  - e. Translate (will translate a highlighted word to Spanish or language chosen in Settings)
  - f. Settings (change voice, speed, language to read, language to translate)
  - g. Help
