

# Tip Tuesday

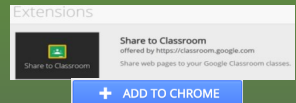

## Quickly Send a Link to Your Google Classroom Students!

*Wouldn't it be great to easily send a link, and the tab automatically pops up in your students' Chrome browsers? Do this:*

- Both teacher & students add the "Share to Classroom" extension to Chrome:

-Go to [Google Web Store](#)

-Search for and add "*Share to Classroom*" extension.

Note: Once you add *Share to Classroom*, it will "follow" you no matter what computer you use - no need to add again :)

- From the website you want to share, in the upper-right-hand corner, *next to the address bar*, click the "Share to Classroom" icon.
- Choose which Classroom and click "Push."  
(There is an option to post as assignment or announcement in Classroom too!)
- That's it! The site opens on the students' Chromebooks! Give it a try today!
